§ 01 — EXECUTIVE OVERVIEW

The Eight Strategic Gateways: A Unified Logistics Landscape.

Board-Ready Briefing · Q1 2026

This report analyzes the eight critical maritime gateways that handle the vast majority of U.S. containerized imports. As the Silicon-to-Steel transition accelerates domestic manufacturing, these eight hubs represent the primary institutional pressure points for logistics portfolios operating at scale. All data current as of Q1 2026.

FOUR FORCES SHAPING 2026

FORCE 01

Mexico Reshoring

Mexico remains the #1 U.S. trade partner for the third consecutive year, driving record volumes through Gulf and East Coast water-bridges.

FORCE 02

Infrastructure Maturity

Completion of the 55-ft deepening in Virginia and the 52-ft project in Charleston enables consistent New-Panamax vessel calls on the East Coast.

FORCE 03

The Battery Belt

Port-adjacent industrial builds in the Southeast are now dominated by EV and renewable energy supply chain requirements.

FORCE 04

Zero-Inventory Mandates

Tightening West Coast vacancy (sub-5%) is driven by a structural shift from Just-in-Time to Just-in-Case buffer stock strategies.

QUICK GLOSSARY

TEU
Twenty-foot Equivalent Unit. The standard measure of container capacity.

FTZ
Foreign Trade Zone. A designated area where goods can be stored, handled, or processed duty-deferred.

New-Panamax
Vessel class requiring 50+ ft channel depth. Standard after the 2016 Panama Canal expansion.

PORT PROFILES

- NY / New Jersey
- Savannah
- Virginia
- Charleston
- Los Angeles
- Long Beach
- Houston
- Seattle / Tacoma

§ 02 — PORT AT A GLANCE

Eight Gateways. One Decision Matrix.

Macro-supply chain resilience begins with gateway selection. The matrix below captures the institutional pressure points across all eight gateways — TEU volume, channel depth, vacancy, and asking rent — in a single view.

PORT / REGION	TEU (CY2025)	YOY	VACANCY	RENT / SF	DEPTH
NY / New Jersey EAST COAST	**8.9M**	+2.8%	4.5% — TIGHT	$16.80	50 ft
Savannah SOUTHEAST	**5.7M**	+3.6%	3.2% — CRITICAL	$8.20	47 ft
Virginia MID-ATLANTIC	**3.5M**	+2.0%	5.1% — MODERATE	$9.40	55 ft ✓
Charleston SOUTHEAST	**2.6M**	+4.0%	4.8% — TIGHT	$7.90	52 ft
Los Angeles WEST COAST	**10.2M**	+2.6%	4.2% — TIGHT	$18.80	53 ft
Long Beach WEST COAST	**9.9M**	+4.2%	4.0% — TIGHT	$18.40	53 ft
Houston GULF COAST	**4.3M**	+3.6%	6.5% — ENTRY WINDOW	$9.50	46.5 ft
Seattle / Tacoma PACIFIC NORTHWEST	**3.2M**	-5.5%	4.6% — MODERATE	$14.20	51 ft
COMBINED TOTAL	**48.3M TEU**				

> *"The smartest play right now is a two-gateway strategy — one East Coast port for premium European product, one Gulf or West Coast port for Asia-Pacific volume. Eight gateways. One coherent expansion thesis."*
>
> CHRIS SCHUPP · EXECUTIVE MANAGING DIRECTOR · NAI ROBERT LYNN

Sources: Port Authority filings, CoStar Group, NAI Global Proprietary Research, Q1 2026.

PORT 1 OF 8 · EAST COAST

New York / New Jersey

Data: 8.1M Annual TEU · Q1 2026

50 ft
CHANNEL DEPTH

ANNUAL TEU	VACANCY RATE	ASKING RENT	AVAILABLE SF
8.1M	**4.5%**	**$16.80**	**780K**
+2.8% YOY	TIGHT	per sq ft · +3.1% YOY	sq ft on market

▲ CHRIS'S TAKE

"With 8.1M TEU and the East Coast's largest consumer market, NY/NJ remains the premium gateway for time-sensitive imports. The real edge in 2026 is leveraging FTZ #1 status and newly expanded CSX/NS rail capacity to compress inland transit times below 48 hours for Midwest distribution. Secure available SF now before the next nearshoring wave tightens the 4.5% vacancy further."

— Chris Schupp · NAI Robert Lynn · cschupp@nairl.com

MACRO VIEW

The largest Atlantic gateway, anchoring Northeast distribution for premium consumer and industrial freight. The one-day drive radius covers 135M consumers — no other U.S. gateway matches this catchment density. Multi-story warehouse redevelopment in New Jersey is the primary value-creation play as traditional single-story inventory parks hit full occupancy.

MARKET TIGHTNESS

Vacancy at 4.5% reflects sustained demand pressure from last-mile logistics operators anchored by Amazon and XPO. Asking rents of $16.80/sf have appreciated 3.1% YOY, with premium submarket locations commanding further premiums from institutions seeking proximity to the 135M-consumer catchment.

MARKET INDICATORS

Asking Rent	**$16.80 / sf**
Annual Change	**+3.1%**
Available SF	**780K,000 sf**
FTZ	**FTZ #1**
FTZ Note	**Duty deferral & mfg.**
Rail Access	**CSX / NS Direct**
Data Vintage	**Q1 2026**

STRATEGIC HIGHLIGHTS

- Largest Atlantic gateway — anchor for Northeast distribution
- Amazon / XPO last-mile hub — integrated final-mile logistics
- FTZ #1 — duty deferral ready for manufacturing inbounds
- 135M consumers within a one-day drive radius

Sources: Port Authority filings, CoStar Group, NAI Global Proprietary Research, Q1 2026.

PORT 2 OF 8 · SOUTHEAST

Port of Savannah

Data: 6.2M Annual TEU · Q1 2026

47 ft
CHANNEL DEPTH

ANNUAL TEU	VACANCY RATE	ASKING RENT	AVAILABLE SF
6.2M	**3.2%**	**$8.20**	**950K**
+5.8% YOY	CRITICAL	per sq ft · +4.4% YOY	sq ft on market

▲ CHRIS'S TAKE

"In Savannah, the play is securing the inland rail-link before the 2027 rate hikes. At 6.2M TEU and critically tight 3.2% vacancy, this is the Southeast's breakout star for Battery Belt manufacturers — including South Korean battery cell suppliers and EV OEM component integrators — chasing sub-$9/sf rents with world-class intermodal access."

— Chris Schupp · NAI Robert Lynn · cschupp@nairl.com

MACRO VIEW

The fastest-growing major port in the U.S., with a dual identity as the preferred retail distribution gateway and an emerging center for Southeast EV supply chain logistics. Garden City Terminal expansion is complete. A $17.5B inland expansion is underway, cementing Savannah's position as the Sunbelt's primary logistics hub.

MARKET TIGHTNESS

Vacancy at 3.2% is critically tight — the tightest of all eight gateways. Despite record industrial absorption in the Savannah/Pooler submarket, asking rents remain well below West Coast benchmarks, presenting a compelling institutional risk/reward for early-positioning capital.

MARKET INDICATORS

Asking Rent	**$8.20 / sf**
Annual Change	**+4.4%**
Available SF	**950K,000 sf**
FTZ	**FTZ #104**
FTZ Note	**10,200 acres duty-free**
Rail Access	**NS / CSX Direct**
Data Vintage	**Q1 2026**

STRATEGIC HIGHLIGHTS

- Fastest-growing major port in the U.S.
- $17.5B inland expansion currently underway
- FTZ #104 — 10,200-acre duty-free staging zone
- Preferred port for retail "Big Box" distribution

Sources: Port Authority filings, CoStar Group, NAI Global Proprietary Research, Q1 2026.

PORT 3 OF 8 · MID-ATLANTIC

Port of Virginia

Data: 3.8M Annual TEU · Q1 2026

55 ft
DEEPEST EAST COAST

ANNUAL TEU	VACANCY RATE	ASKING RENT	AVAILABLE SF
3.8M	**5.1%**	**$9.40**	**620K**
+4.1% YOY	MODERATE	per sq ft · +2.9% YOY	sq ft on market

▲ CHRIS'S TAKE

"Now the deepest on the East Coast at 55 ft, Virginia is primed for unrestricted ULCV calls. For institutional portfolios, the moderate 5.1% vacancy signals immediate opportunity: lock in the 620K SF on market before post-deepening demand drives asking rents above $10/sf."

— Chris Schupp · NAI Robert Lynn · cschupp@nairl.com

MACRO VIEW

The 55-ft channel deepening, completed Q1 2026, makes Virginia the deepest port on the U.S. East Coast and the definitive deep-draft gateway for New-Panamax and ultra-large vessel calls. CSX/NS rail connectivity provides direct access to the Ohio Valley manufacturing corridor — preferred for heavy industrial and manufacturing imports.

MARKET TIGHTNESS

Vacancy at 5.1% offers a near-term acquisition window before deep-draft demand drives vacancy to structural lows. Site-level execution advantage exists now for institutions targeting East Coast resilience positions ahead of the post-deepening demand cycle.

MARKET INDICATORS

Asking Rent	**$9.40 / sf**
Annual Change	**+2.9%**
Available SF	**620K,000 sf**
FTZ	**FTZ #20**
FTZ Note	**Federal campus adjacent**
Rail Access	**CSX / NS Dual**
Data Vintage	**Q1 2026**

STRATEGIC HIGHLIGHTS

- 55-ft channel deepening complete Q1 2026 — deepest on East Coast
- Ultra-large vessel capable, no tidal windows required
- FTZ #20 — adjacent to federal defense complex
- Best-in-class rail connectivity to Ohio Valley

Sources: Port Authority filings, CoStar Group, NAI Global Proprietary Research, Q1 2026.

PORT 4 OF 8 · SOUTHEAST

Port of Charleston

Data: 2.9M Annual TEU · Q1 2026 · The Battery Belt Gateway

52 ft
NEW-PANAMAX CAPABLE

ANNUAL TEU	VACANCY RATE	ASKING RENT	AVAILABLE SF
2.9M	**4.8%**	**$7.90**	**540K**
+6.2% YOY	TIGHTENING	per sq ft · +5.1% YOY	sq ft on market

▲ CHRIS'S TAKE

"Charleston's +6.2% growth and Battery Belt positioning make it the fastest riser in the eight-gateway matrix. EV OEM suppliers for BMW, Mercedes-Benz, and Volvo assembly plants within a three-hour drive are the primary demand driver. With New-Panamax capability and the lowest Southeast rents, prioritize FTZ-eligible sites immediately — before EV supply chain integration tightens the 4.8% vacancy further."

— Chris Schupp · NAI Robert Lynn · cschupp@nairl.com

MACRO VIEW

Charleston is the gateway of the "Battery Belt" — the Southeast EV and automotive supply chain cluster anchored by BMW, Mercedes-Benz, and Volvo assembly operations within a three-hour drive. The port's 52-ft channel depth enables consistent New-Panamax vessel calls with no tidal restrictions, critical for just-in-time EV assembly schedules.

MARKET TIGHTNESS

Rent appreciation of 5.1% YOY is the highest of any Southeast gateway. Industrial absorption driven by EV OEM logistics demand — particularly lithium-ion component and battery cell supply chains — continues to compress vacancy from a baseline already below historical averages.

MARKET INDICATORS

Asking Rent	**$7.90 / sf**
Annual Change	**+5.1%**
Available SF	**540K,000 sf**
FTZ	**FTZ #21**
FTZ Note	**SC Ports Authority coord.**
Rail Access	**CSX Southeast**
Data Vintage	**Q1 2026**

STRATEGIC HIGHLIGHTS

- Battery Belt gateway — EV OEM & lithium-ion component logistics hub
- 52-ft channel — New-Panamax capable, no tidal restriction
- FTZ #21 — coordinated with SC Ports Authority
- BMW, Mercedes-Benz, Volvo assembly within 3-hour drive

Sources: Port Authority filings, CoStar Group, NAI Global Proprietary Research, Q1 2026.

PORT 5 OF 8 · WEST COAST

Port of Los Angeles

Data: 9.8M Annual TEU · Q1 2026 · #1 U.S. Container Port by Volume

53 ft
CHANNEL DEPTH

ANNUAL TEU	VACANCY RATE	ASKING RENT	AVAILABLE SF
9.8M	**4.2%**	**$18.80**	**680K**
+3.3% YOY	TIGHT	per sq ft · +2.7% YOY	sq ft on market

▲ CHRIS'S TAKE

"As the #1 U.S. container port by volume, LA's structural tightness (4.2% vacancy) reflects the shift to Just-in-Case stockpiling. The 2026 play is to pair 9.8M TEU throughput with inland intermodal to mitigate West Coast premium rents while capitalizing on Asia-Pacific direct calls."

— Chris Schupp · NAI Robert Lynn · cschupp@nairl.com

MACRO VIEW

The #1 U.S. container port by volume, with 9.8M TEU processed in Q1 2026. TraPac and LBCT automation at peak optimization drives throughput efficiency that continues to outpace East Coast alternatives for Asia-Pacific origin freight. Expanded on-dock rail to Chicago ensures onward distribution reach.

MARKET TIGHTNESS

Vacancy at 4.2% with asking rents at $18.80/sf reflects the institutional premium commanded by the primary trans-Pacific gateway. FTZ #202, connected to the Alameda Corridor, provides duty-deferral infrastructure for import-heavy distribution portfolios.

MARKET INDICATORS

Asking Rent	**$18.80 / sf**
Annual Change	**+2.7%**
Available SF	**680K,000 sf**
FTZ	**FTZ #202**
FTZ Note	**Alameda Corridor**
Rail Access	**BNSF / UP**
Data Vintage	**Q1 2026**

STRATEGIC HIGHLIGHTS

- #1 U.S. container port by volume
- TraPac and LBCT automation at peak optimization
- FTZ #202 — Alameda Corridor connected
- Expanded on-dock rail capacity to Chicago corridor

Sources: Port Authority filings, CoStar Group, NAI Global Proprietary Research, Q1 2026.

PORT 6 OF 8 · WEST COAST

Port of Long Beach

Data: 9.8M Annual TEU · Q1 2026 · Deepwater Leader

76 ft
DEEPEST WEST. HEMISPHERE

ANNUAL TEU	VACANCY RATE	ASKING RENT	AVAILABLE SF
9.8M	**4.0%**	**$18.40**	**720K**
+3.1% YOY	TIGHT	per sq ft · +2.5% YOY	sq ft on market

▲ CHRIS'S TAKE

"The deepwater leader at 76 ft, Long Beach delivers unmatched vessel flexibility for the largest class ships. With structurally tight markets, the strategic advantage lies in its efficiency for high-value precision auto and electronics — securing the 720K SF on market now positions tenants ahead of the next capacity wave."

— Chris Schupp · NAI Robert Lynn · cschupp@nairl.com

MACRO VIEW

At 76 ft, Long Beach holds the deepest channel depth in the Western Hemisphere, making it the only U.S. West Coast port capable of handling super-Panamax and ultra-large container vessels without restriction. Expanded on-dock rail to Chicago reduces intermodal transit by 6-8 hours. FTZ #50 provides comprehensive duty-deferral capacity.

MARKET TIGHTNESS

Vacancy at 4.0% is the tightest of the two San Pedro Bay gateways. Increasingly preferred for over-dimensional and project cargo requiring maximum draft clearance, driving sustained demand from energy, defense, and heavy industrial sectors.

MARKET INDICATORS

Asking Rent	**$18.40 / sf**
Annual Change	**+2.5%**
Available SF	**720K,000 sf**
FTZ	**FTZ #50**
FTZ Note	**San Pedro Bay complex**
Rail Access	**BNSF / UP On-Dock**
Data Vintage	**Q1 2026**

STRATEGIC HIGHLIGHTS

- 76-ft channel — deepest in the Western Hemisphere
- Essential for energy, defense, and heavy-lift sectors
- On-dock rail reduces intermodal transit by 6-8 hrs
- FTZ #50 — integrated San Pedro Bay complex

Sources: Port Authority filings, CoStar Group, NAI Global Proprietary Research, Q1 2026.

PORT 7 OF 8 · GULF COAST

Port of Houston

Data: 4.1M Annual TEU · Q1 2026 · Primary Nearshoring Node

46.5 ft
CHANNEL DEPTH

ANNUAL TEU	VACANCY RATE	ASKING RENT	AVAILABLE SF
4.1M	**6.5%**	**$9.50**	**850K**
+3.6% YOY	ENTRY WINDOW	per sq ft · +5.2% YOY	sq ft on market

▲ CHRIS'S TAKE

"Houston's role as primary nearshoring node for America's #1 trade partner (Mexico) creates the clearest entry window in the matrix. At 6.5% vacancy and $9.50/sf, this Gulf gateway offers the lowest friction for water-bridge bypasses — ideal for motor vehicles, machinery, and electronics with 1-2 day overland advantages."

— Chris Schupp · NAI Robert Lynn · cschupp@nairl.com

MACRO VIEW

The only major U.S. port where outbound TEU exceeds inbound, making Houston the primary nearshoring node for Mexico-origin manufacturing. Maritime Short Sea Shipping from Veracruz delivers 2-3 day transit times with none of the land-border delays that routinely add 48-72 hours to truck-based supply chains.

MARKET TIGHTNESS

Vacancy at 6.5% represents the largest available window across all eight gateways — a counter-cyclical opportunity for institutions ahead of nearshoring demand acceleration. Rent appreciation of 5.2% YOY signals institutional pressure points are already forming.

MARKET INDICATORS

Asking Rent	**$9.50 / sf**
Annual Change	**+5.2%**
Available SF	**850K,000 sf**
FTZ	**FTZ #84**
FTZ Note	**Petrochemical corridor**
Rail Access	**Union Pacific NAFTA**
Data Vintage	**Q1 2026**

STRATEGIC HIGHLIGHTS

- Only major U.S. port where outbound TEU exceeds inbound
- Short Sea Shipping from Mexico bypasses Laredo/El Paso
- FTZ #84 — petrochemical corridor infrastructure
- Primary nearshoring gateway for LATAM-exposed supply chains

Sources: Port Authority filings, CoStar Group, NAI Global Proprietary Research, Q1 2026.

PORT 8 OF 8 · PACIFIC NORTHWEST

Port of Seattle / Tacoma (NWSA)

Data: 3.2M Annual TEU · CY2025 · Closest U.S. Port to Asia

51 ft
CHANNEL DEPTH

ANNUAL TEU	VACANCY RATE	ASKING RENT	CHANNEL DEPTH
3.2M	**4.6%**	**$14.20**	**51 ft**
-5.5% YOY	MODERATE	per sq ft	Post-Panamax capable

▲ CHRIS'S TAKE

"Seattle shaves a full transit day off the Asia-to-U.S. route versus LA. For time-sensitive trans-Pacific cargo — electronics, automotive components, perishables — the Puget Sound gateway offers a real logistics edge. FTZ #86 and on-dock BNSF/UP rail make it the optimal Pacific Northwest entry point. Volume dipped in 2025 but the structural advantages are intact."

— Chris Schupp · NAI Robert Lynn · cschupp@nairl.com

MACRO VIEW

The Northwest Seaport Alliance (shared by the ports of Seattle and Tacoma) sits closer to Asia by great-circle routing than any other U.S. container gateway, cutting roughly one sailing day off the Los Angeles / Long Beach route for trans-Pacific carriers. The Puget Sound industrial market serves Boeing, Amazon, and major 3PL operators anchored to the Pacific Rim trade corridor, plus a substantial Alaska cargo hub function unique to this gateway.

MARKET CONDITIONS

Vacancy at 4.6% reflects moderate availability in the Puget Sound industrial submarket. Volume contracted 5.5% in CY2025 against a strong 2024 baseline, reflecting tariff-driven cargo repositioning. Asking rents of $14.20/sf are well above Gulf Coast markets and below Southern California, positioning Seattle as a mid-tier rent market with above-average logistics infrastructure.

MARKET INDICATORS

Asking Rent	**$14.20 / sf**
TEU Volume	**3.2M CY2025**
YOY Change	**-5.5%**
FTZ	**FTZ #86**
Rail Access	**BNSF + Union Pacific**
On-Dock Rail	**Yes**
Data Vintage	**CY2025**

STRATEGIC HIGHLIGHTS

- Closest U.S. port to Asia — one sailing day advantage over LA
- FTZ #86 + on-dock BNSF/UP rail for Midwest distribution
- Primary Alaska cargo hub — unique among all eight gateways
- Boeing + Amazon + major 3PL anchor tenants in submarket

Sources: Northwest Seaport Alliance CY2025 Annual Report, CoStar Group, NAI Global Proprietary Research, Q1 2026.

§ 05 — PORT-COUNTRY CORRIDORS

Your Country. Your Gateway. The Verified Path.

Eight international trade corridors — primary gateway, transit time, key trend, and market share.

COUNTRY	TRADE VOL.	SHARE	PRIMARY GATEWAY	TRANSIT	KEY TREND
Mexico	~$475B	15.8%	Houston / LA	2-5 days	Water-bridge bypass of Laredo/El Paso growing
China	~$427B	14.3%	LA / Long Beach	14-18 days	Component-heavy inbound for domestic assembly
Germany	~$160B	5.4%	NY/NJ / Virginia	7-10 days	Industrial machinery — heavy-lift manufacturing
Japan	~$148B	5.0%	Long Beach	10-14 days	Precision auto — high-value specialized equipment
United Kingdom	~$134B	4.5%	NY / NJ	6-9 days	Consumer goods & financial services sector
South Korea	~$112B	3.8%	Savannah / CHS	12-16 days	"Battery Belt" EV/tech supply chain integration
India	~$87B	2.9%	Savannah	18-22 days	Pharma & IT hardware — fastest-growing corridor

MEXICO SPOTLIGHT — #1 U.S. TRADE PARTNER

~$475B in total U.S. goods imports, Q1 2026. Primary gateways: Houston (overland) + LA / Long Beach (Pacific). Top product categories: Motor Vehicles & Parts (~26%) · Industrial Machinery (~16%) · Electronics (~14%) · Agricultural & Food Products (~9%) · Medical Devices (~6%). Transit: 2-5 days overland · 4-8 days rail · Houston gateway 1-2 days.

Sources: Port Authority filings, CoStar Group, NAI Global Proprietary Research, Q1 2026.

§ 06 — MARKET ENTRY PROCESS

From Decision to Lease: The NAI Global 14-Week Process

Site-level execution, from brief to signed lease, in a predictable institutional timeline.

01

Port-Market Matchmaking

We score your logistics profile against all eight gateways and rank by institutional fit. Output: a single recommended gateway with supporting rationale and competitive alternatives.

02

Industrial Site Shortlist

NAI's local broker network delivers 3-5 qualified sites within 48 hours of brief. All sites are pre-screened for FTZ eligibility, rail access, and institutional-grade lease terms.

03

Due Diligence & Incentive Stacking

We coordinate FTZ designation, state enterprise zone qualification, and port authority incentives simultaneously — not sequentially. Parallel-track process compresses timeline by 4-6 weeks versus standard practice.

04

Lease Negotiation & Execution

NAI brokers represent your interests exclusively. Average time from shortlist to signed LOI: 3.5 weeks. All lease terms benchmarked against port-market comparables.

05

Operational Launch Support

Post-close: customs broker referrals, freight forwarder introductions, and ongoing market intelligence subscription. The relationship does not end at lease execution.

14

Weeks. Brief to Signed Lease.

Based on 23 completed transactions, Q1 2024-Q1 2026. Institutional-grade advisory with site-level execution velocity.
